HCL BigFix
Known Exploited Vulnerabilities Content Pack Add On

Empowers BigFix users to quickly and continuously report on compliance against CISA's Known Exploited Vulnerabilities (KEVs) on BigFix-supported platforms

HCL BigFix

Research has shown that many cybersecurity incidents result from well-known vulnerabilities which have gone unpatched. Lengthy delays in identifying and remediating known vulnerabilities may lead to greater security risk, data breaches and ransomware attacks.

The Cybersecurity and Infrastructure Security Agency (CISA) publishes the Known Exploited Vulnerabilities (KEV) catalog to provide an authoritative source of vulnerabilities that have been exploited "in the wild." The CISA KEV catalog continues to grow and now contains more than 1000 KEVs. As a result, many Federal and non-Federal organizations continue to struggle to remediate KEVs in a timely and efficient way.

The HCL BigFix Known Exploited Vulnerabilities (KEVs) Content Pack Add On delivers a powerful solution that speeds the identification of KEVs so IT organizations can plan, prioritize and execute remediation plans. The Content Pack slashes the time organizations take to discover and remediate KEVs which is particularly important for Federal organizations that must adhere to Binding Operational Directive (BOD) 22-01. Many non-Federal organizations are also prioritizing the remediation of CISA's KEVs as a cornerstone of their strategy in securing their environment.

You can review the content delivered in the HCL BigFix Known Exploited Vulnerabilities (KEVs) Content Pack Add On by visiting the BigFix Wiki.

Highlights

- Provides ready-to-deploy content for quickly discovering and remediating KEVs on BigFix-supported platforms. Supports

- CISA Known Exploited Vulnerability Exposure Analyzer delivered with BigFix CyberFOCUS Security Analytics.

- The Content Pack is included with BigFix Workspace+ and BigFix Enterprise+ and is available as an add-on to BigFix Lifecycle, BigFix Compliance, and BigFix Remediate.

About HCLSoftware

HCLSoftware develops, markets, sells, and supports product families in the areas of Digital Transformation, Data, Analytics & Insights, AI & Automation and Enterprise Security platforms. HCLSoftware is the cloud-native solution factory for enterprise software and powers millions of apps at more than 20,000 organizations, including more than half of the Fortune 1000 and Global 2000 companies. HCLSoftware's mission is to drive ultimate customer success with its IT investments through relentless product innovation.
