HCLSoftware

HCL DevOps Loop

Modern DevOps Solutions - Engineered for Every Industry

AI-Driven DevOps

Agility and innovation are in high demand to address rapidly evolving digital challenges. HCL DevOps Loop revolutionizes workflows, delivers unmatched security and visibility to keep you ahead of the curve.

Experience the power of our unique 'Loop' approach—your gateway to instant, clear delivery insights. With key metrics from every stage of your workflow—from application planning and source code to deployment, testing, security, and value streams—everything you need is right at your fingertips. Plus, our intuitive 'Loop Genie' AI lets you simply ask for a project snapshot in everyday language, keeping you informed and ahead of the curve.

Features

- **Automated Testing:** Robust automation ensures quality while reducing manual effort.

- **Advanced Analytics:** Real-time insights optimize processes and identify bottlenecks.

- **Integration Flexibility:** Leverage existing products like Jira, Jenkins, Git, and Kubernetes.

- **Enterprise-Grade Deployment:** Seamlessly deploy applications on-premises or in the cloud.

Power Up Your Organization

The challenges faced in software delivery are unprecedented. With shifting market demands and the need for faster delivery, outdated products hinder progress. Bridging strategy and operations, HCL DevOps Loop enables organizations to adapt with agility, maintain stringent security, and maximize productivity.

Benefits

- **Faster Innovation:** Accelerate development, adapt quickly, and deliver new capabilities.

- **Optimized Costs:** Reduce manual work, minimize downtime, and focus on strategic projects.

- **Lower Risk:** Strengthen governance, prevent failures, and ensure compliance.

- **Expert Support:** Access industry experts, best practices, and client advocacy.

Accelerate, Secure, and Unify DevOps

HCL DevOps Loop drives data-driven decisions with analytics and reporting, fosters collaboration with shared tools, and accelerates delivery through automated testing, builds, and deployments. With integrated security, risk-mitigating release strategies, and comprehensive monitoring, it ensures faster, more reliable releases while unifying DevOps management in a single platform.
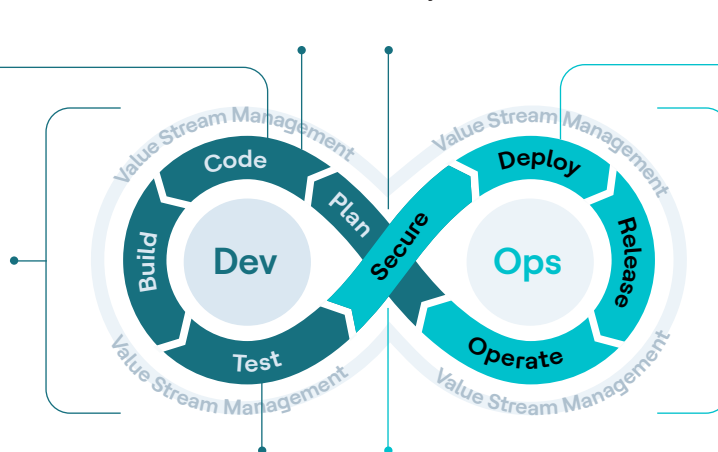

Development Environment
Create stateful, event-driven and real-time applications

Secure and manage development assets
Source code, schematics, designs, documentation, test scripts... anything.

Change and issue management with custom workflow automation
Agile Boards, Work Item Management, approvals, notifications, tracking, workflow... Fully customizable

Deploy anything, anywhere
Continuously Deliver better quality applications, faster than ever before

Maximize your DevOps investment with Value Stream Management
Make work visible, exploit bottlenecks, and improve DevOps flow across the organization

Compose with your existing environment
An investment with HCL Software DevOps doesn't mean you have to replace the tools and platforms your team knows and loves – instead, we help you maximize and leverage the tools you already have, like Jira, Jenkins, Git and Kubernetes.

Easily **plan, deliver, version, test, and deploy real-time applications** with full visibility through **Value Stream Management.**

Deliver quality with enterprise test automation
UI, API, embedded and performance testing, with service virtualization and test data fabrication

Rapidly identify, understand and remediate security vulnerabilities
identify, understand and remediate vulnerabilities, and achieve regulatory compliance

Proven Success

Leading enterprises worldwide trust HCL's DevOps Loop platform to streamline software delivery, enhance collaboration, and drive innovation. From global banks to manufacturing giants achieving near-zero downtime, our platform delivers tangible results. With automated testing, intelligent analytics, and seamless integrations, organizations gain the agility to release faster, improve reliability, and drive business growth.

Read below to learn more about our real-world successes where HCL DevOps Loop has transformed development lifecycles and delivered measurable ROI.

Pharmaceutical

Challenge:
Governance and pipeline visibility issues hindered delivery.

Solution:
Tailored software and services improved workflow and security integration.

Results:
Enhanced digital transformation metrics and significant cost savings.

Telecom

Challenge:
Slow delivery processes inflated operational costs.

Solution:
Automated testing and streamlined operations enabled faster feature delivery.

Results:
Annual cost savings of $4 million and increased delivery capacity from 100 to 1000 changes per month.

Your DevOps Journey Starts Today
